#### About the 3rd Asia-Pacific International Intelligent Equipment Exposition

On August 3-7, 2022, the 3rd Asia-Pacific International Intelligent Equipment Exposition was successfully held at Hongdao International Conference and Exhibition Center in Qingdao. Centered on intelligent manufacturing, based in Qingdao and facing Asia-Pacific region, the Asia-Pacific International Intelligent Equipment Exposition fully focuses on the upstream and downstream industrial chain of intelligent manufacturing industry, and fully presents prospects and opportunities of the industry in the era of intelligent manufacturing while gathering brand exhibitors in the field of international high-quality intelligent manufacturing,.

The exposition attracts many brand exhibitors to attend with more than tens of thousands of latest products and solutions. Relying on the solid digital technology and abundant digital practice of exhibitors, the exposition helps more manufacturing enterprises strengthen digital and intelligent construction, enhance product competitiveness, build digital integration factory, assist traditional manufacturing industry in opening up new prospects of lean digitalization, and also provide "new engine" for the development of manufacturing industry in post-pandemic era.

During the exposition, the 5th CJK2022 China-Japan-Korea Intelligent Manufacturing Conference was held at the same time, focusing on the industry hot spots, centering on the concepts of digitization, networking and intelligence of manufacturing industry, and the concept of digitalization and transformation, undertaking discussion from the perspective of dimensions, principles, standards, technologies and practices, and dedicated to building up a large-scale international intelligent equipment exchange platform capable of solving user needs and leading the direction of industry development with intelligent turing system, top processing technique and personalized machining solutions.

visiting group (units)

The exposition successfully attracted more than 300 professional purchasing groups consisting of more than 10 persons from 23 provinces, autonomous regions and municipalities directly under the Central Government throughout the country. The site is popular, cheerful and rich in supply and demand supporting activities. Professional buyers and exhibitors seized new market opportunities to conduct face-to-face in-depth procurement, deepen the upstream and downstream and cross-regional cooperation of the industrial chain, aggregate the advantages of the industry and promote the development of the industry efficiently.

### Exhibitor's voice

#### RITTAL ELECTROMECHANICAL TECHNOLOGY (SHANGHAI) CO., LTD.

Under Covid-19, although it was the first time for our company to participate in the Asia-Pacific International Intelligent Equipment Exposition, we gained a lot. Our company brought Blue e+S and explosion-proof box solutions to the exposition. As an energy-saving and emission reduction solution launched in 2022, Rittal Blue e+ made a breakthrough in energy-saving technology and digital technology. We use these technologies and a new condensation technique in combination to achieve the goal of saving 75% of energy and reducing global warming potential (GWP) to a lower level. Through a large number of visitors and the professionalism of the audience, our company thought the Asia-Pacific International Intelligent Equipment Exposition as a good platform for business communication. We hope the exposition will become better and better!

#### ROKAE (BEIJING) TECHNOLOGY CO., LTD.

\_\_\_\_\_

Our company always pays close attention to the platform provided by Asia-Pacific International Intelligent Equipment Exposition. This year, we attended the exposition with our new generation of flexible and cooperative "CR" robots and many industrial solutions. The offline traffic and customer quality were better than our expectations. Many new and old customers came to the booth for information and inquiry. What's more, the exposition showed sufficient professionalism in the service before the exhibition, the publicity, and the order in the exhibition. We look forward to the 2023 exposition!

#### MECH MIND ROBOT TECHNOLOGY CO., LTD.

We' d like to express our heartfelt thanks to the of the Asia-Pacific International Intelligent Equipment Exposition sponsors for providing an information exchange platform and exhibiting opportunities, where visitors can see many new technologies and solutions. Both the audiences and the potential customers are of high quality. We had further developed the market through this exhibition. We hope the Asia Pacific International Intelligent Equipment Exposition becomes better and better, and our company will continue to support!

#### SHANGHAI ANPU MOONS AUTOMATION EQUIPMENT CO., LTD.

The Asia-Pacific International Intelligent Equipment Exposition provided a broad window, and its publicity and promotion were excellent. It allowed us to push our products directly to the users in our industry. Besides, the visitors were highly professional and targeted. It established a good exchange and trade platform for exhibitors and buyers, and helped us find many new development directions. We look forward to the exposition in 2023!

#### HANGZHOU CRON ELECTROMECHANICAL INDUSTRY CO., LTD.

From the preparation and arrangement before the exhibition to the process of exhibition, the organizers had provided us with considerate service. We solved problems together through active communication. With this chance, more audiences knew about us and had a more detailed understanding of our technology. Our attendance at this exhibition was worthwhile, and we hope that the exposition will make progress in the future.

# ₩ Ю睿机器人

#### ZHEJIANG MRROBOTICS CO., LTD.

This Asia-Pacific Intelligent Equipment Exposition was very successful. Our latest series of L3 latent "AMR" intelligent transport robots attracted the attention of many buyers. Our company reached cooperation intention with many buyers in the exposition. In this exhibition, we met many new friends and had deep communication with our old customers. We are very satisfied with the effectiveness of the exhibition. We hope the exposition will become better and better, and we will meet again next year.

### **S** The 5th China–Japan–Korea Intelligent Manufacturing Conference

### CONFERENCE ACTIVITIES -

### Meeting in Qingdao, Intelligence towards the Future

The intelligent manufacturing conference of China, Japan, and South Korea discusses the concept of Digital Manufacturing, networking, intelligence, digitalization, and transformation of the manufacturing industry from dimension, principle, standard, technology, and practice. The industry experts focused on hot spots, interpreted the industry trend, and raised insightful and critical points about the existing problems. The conference provides us with ideas and methods from successful cases for the upstream and downstream enterprises of the industrial chain. It also explores the trend of transformation and possibilities in the future.

China-Japan-South Korea Manufacturing Conference Welcome Dinner **China Promotion of Intelligent Manufacturing Outstanding CEO Sixiang Wine Fair** 

潮泊青多智向未来

On August 2, the China-Japan-South Korea Manufacturing Conference Welcome Dinner and the China Promotion of Intelligent Manufacturing Outstanding CEO Sixiang Wine Fair took place. , Nearly 200 CEOs of important enterprises in automobile manufacturing, energy equipment, machinery manufacturing, or other fields were invited to participate in the dinner to jointly explore the "road of digital intelligence transformation in enterprises". They shared famous enterprises' practices, experiences, experiences, and insights of in promoting digital intellectual transformation. They exchanged different opinions and achieved a common understanding in communication. With delicate French food and wine as companions, participants had a good time creating blueprints for intelligent manufacturing together.

Specially, we invited Du Riqiang, Vice President of June Energy Heavy Industry Group, Zhao Jinrong, Deputy General Manager of Jinan Second Machine Tool Group, You Song, President of Swiss Baichao Group, Wang Shihua, General Manager of Qingdao Kenile Group and Liu Bo, General Manager of Industrial & Research Capital Holding Co., Ltd. to give speeches. It enabled more manufacturing enterprises to realize transformation of digital intelligence through their insightful opinions exchange and thinking collision.

Opinions exchange, thinking collision transformation of digital intelligence in enabling enterprises
